

About the programme:

Pursuant to The Stock Exchange of Hong Kong Limited's Consultation Conclusions and its ESG Review Findings released on 18 December 2019, the requirements for the ESG reporting have been increased remarkably both in width and depth. It is getting more and more challenging for directors to discharge their duties. In this seminar, the speaker, currently acting as an INED of a listed company, would like to address the new requirements and implications as well as his insights on those challenges being faced by directors:

- Effective date;
- Mandatory disclosure
 - Board statement;
 - Reporting principles; and
 - Reporting boundaries;
- Disclosure of significant climate-related issues which have impacted or may impact the issuer;
- Disclosure of relevant targets regarding “environmental key performance indicators (“KPIs”)”;
- Disclosure of relevant targets regarding “Social KPIs”;
- Challenges to be faced and action to be taken by directors.
